

Discover IntegriSign® Express

Why eSign?

IntegriSign Express is a fast, easy, and safe way to handle business processes that require a signature.

Security: With IntegriSign Express, security refers to both the application itself and the environment where it is hosted. You can esign with peace of mind.

Simplicity: IntegriSign Express lets you complete the same tasks you do now – just more efficiently. Send a document to as many signatories as you like just as easily as you send an email.

Speed: Capturing business opportunities means working at Internet speed. Complete an esigning process in the time it takes you to walk to the fax machine.

IntegriSign Express for NetSuite

Are you a NetSuite customer? IntegriSign Express, fully integrated within NetSuite CRM+, lets you and your customers esign quotes, estimates and contracts without having to exit the application. NetSuite's sales organization is using IntegriSign Express, you can too! For details: www.integrисignexpress.com/netsuite

Deployment Options

A hosted solution, IntegriSign Express can also be seamlessly integrated within a third-party, web-based application. Contact Interlink to discuss your integration needs.

On-Demand eSignatures Accelerate Business

What Is IntegriSign Express?

IntegriSign Express is an on-demand electronic signature service that provides a fast, simple, secure way for you to easily execute common business processes, like having a client sign a non disclosure agreement, an estimate, or a contract. And, it's as easy to use as sending an email!

Benefits: Work Faster, Cut Costs

As a hosted solution, IntegriSign Express accelerates the deployment of electronic signature technology and expedites business transactions. Once you open an account, you can complete an esigning process in the time it takes to walk to the fax machine.

IntegriSign Express is a key example of the growing movement to "Cloud Computing" – real-time delivery and consumption of business and consumer services through the Internet. Cloud Computing is a faster way to deliver services without adding any technology overhead, giving users, with minimal IT skills, tremendous efficiency in their daily work processes.

How It Works: As Easy as Email

From the IntegriSign Express web site, you can send a document to as many signatories as you like just as easily as you send an email. A recipient clicks, views the document, and esigns – all in seconds. Everyone receives a PDF copy of the signed document that can be stored in any document management or archiving system.

If it sounds incredibly simple, that's because it is. You never have to worry about confusion with IntegriSign Express. You receive email notification when the process is done. The system allows you to see which of the recipients has opened and signed the documents.

eSign in Four Easy Steps
